

OUR PRODUCTS

If you have ever had breakdowns or catastrophic failure of your pumpjack due to galvanic corrosion or uneven wear of the sucker rod then we have the solution for you. Element Energy Solutions markets several products that are designed to mitigate or eliminate these two undesirable and costly problems

EVER PUMP

The Ever-Pump Rotator Arm Stop and Roller Assembly, manufactured by Element Energy Solutions, is an innovative patented device that ensures the rotator works reliably thereby extending the life of your sucker rod and tube while reducing production downtime due to catastrophic failure

EVER LUBE

The Ever Lube Insulating Tube is manufactured from cast nylon and possesses strong dielectric properties. It is deployed between the sucker rod rotator and carrier plate and is self lubricating. There is no metal to metal contact and it prevents electrical continuity to the rod string reducing the potential for galvanic corrosion and electrolysis

MAINTAINING OIL PUMPJACKS INVOLVES COSTS THAT IMPACT ITS OVERALL EFFICIENCY AND PRODUCTIVITY.

Extracting crude oil from a oil well with a pumpjack is an efficient and simple method but one that places constant wear and tear on the equipment, requiring requiring constant service and maintenance. In order to maintain smooth operations and extend equipment life pumpjack owners/operators are always on the lookout for new ideas or parts that reduce cost and/or improve efficiency and uptime.

ELEMENT
ENERGY SOLUTIONS LLC

EVER PUMP

**SADDLE BRACKET W/ROLLER
(DOES NOT INCLUDE PIPE
EXTENSION)**

ARM STOP W/CLAMP

- KEEPS ROTATOR ARM FROM GOING PAST 90°

**10 - 1" Schedule 40 pipe
extension with one end
threaded for the Saddle
Bracket w/roller**

**Benefits of the Saddle Bracket Roller
& Arm Stop**

- Eliminates the need for rotator cable, which prevents tangling of the load cell cable

CLAMPS

STUFFING BOX CLAMP

**WELLHEAD CLAMP EXTENDED
ARM - USE WITH CATCH BASIN**

WELLHEAD CLAMP STANDARD

EVER PUMP IS SOLD AS KITS

•STUFFING BOX CLAMP KIT

- STUFFING BOX CLAMP
- ARM STOP
- SADDLE BRACKET W. ROLLER

WELLHEAD CLAMP KIT

- WELLHEAD CLAMP
- ARM STOP
- SADDLE BRACKET W. ROLLER

CATWALK CLAMP KIT

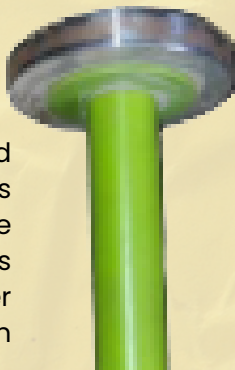

- CATWALK CLAMP
- ARM STOP
- SADDLE BRACKET W. ROLLER

EVER LUBE - EXTENDED INSULATOR TUBE W/PLATE

The bridle hanger can be bored out to fit the extended tube

Purpose is to isolate rod string, stopping electrolysis from entering unit. The insulator tube also is designed to help level carrier bar and reduces wear on polish rod.

**Can be used for all types of
pumping units**
